Memo For The Record

On 4 June 1985 [] SECOM Staff advised that he will be tasking members when the minutes come out next week to provide input on their ideas for classifying or not classifying DCID 1/7. For our information, [] talked with OIS yesterday and they suggested that the document be more detailed with helpful illustrations that are, indeed, classified.

STAT

STAT

SECOM wants the document classified at the Confidential level. Paragraph markings could also be considered although the marking, themselves would be unclassified. DOD has issued the document to some one million people as unclassified and Maynard Anderson wants it to stay that way.

OS response can be solicited after the minutes are received more clearly defining the scope of the tasking.
